

MEETING REPORT

Team Name: DMS

Date of Meeting: 20/03/2019

Start Time: __12:30__

End Time: __14:00__

Meeting Location: __Epoka University__

Recorder: __Alban Shehi__

Other Members Present: Nensi Ahmetbeja, Erika Balliu, Gersi Gjidia, Ina Panavija, Jurgen Laska.

Topics Discussed:

Getting also the professor approval, Distribution Management System was the most suitable system for us to analyze and optimise. All of us gave our ideas on creating a system that drastically improves the way distribution companies operate, making it more efficient, less time consuming, easier to manage and reach out it's customers and most importantly easier to expand and maximize profit. There might be other Distribution Systems out there which might work well but our System's innovative side will rely on trying to use the map updated on real time to keep track of orders and employees. Also suggestions about the company (OSHEE- an isotonic drink) we are thinking to provide is to have their drivers become their sales agents as well so when they are finished distributing their orders, the rest of the clocked-in time is going to be spent on expanding the network of customers. Another thing we are thinking is to include in our Distribution Management System an algorithm to rank the employees so that in the end of every month, the employee of the months gets a motivational bonus.

Decisions Made:

We decided that the most important Departments to implement in the System are going to be: Finance, Sales, Warehouse and Management. Also the most innovative part will be the mapping. We should also find the way to calculate the employee of the month as a great way to motivate employees.

Tasks Assigned:

Dividing the tasks was not that hard for the group, since it is 6 of us, we all get to help each other. The leader Nensi has proven to be the best programmer of the group so she is mostly in charge for the web page. I am going to try my best to learn as much android as possible and try to even build an app for the System. Gersi, Jurgen, Ina and Erika are going to make a deep analysis of the business and simplify all of the functionalities to make it way more efficient.

Time, Place, and Agenda for Next Meeting:

25/03/2019, @12.00, Epoka University

Agenda: Sketches.
